Finding and Fixing Sentence Fragments

Understand the difference between a sentence and a fragment.

A fragment resembles a sentence in two ways. Both groups of words begin with a capital letter and conclude with an end mark—usually a period ( . ) but sometimes a question mark ( ? ) or an exclamation point ( ! ).

The one important difference is that a fragment does not contain a main clause. Like an engine, the main clause powers a complete sentence, propelling the reader through the development of an idea. A fragment, missing this essential component, stalls on the page.

To have a main clause, you must find three things: a subject, a verb, and a complete thought. If you are missing one of these three items, a fragment is the result.

Here are examples of fragments:

And yawned loudly enough to make everyone in class turn around.
Subject = Ø; verb = yawned; complete thought = Ø.

The boy sitting on the fire escape, dropping water balloons on the pedestrians below.
Subject = boy; verb = Ø; complete thought = Ø.

After Gabriel ate half a box of donuts.
Subject = Gabriel; verb = ate; complete thought = Ø.

Learn how to identify the different types of fragments.

You can correct a fragment two ways: 1) adding the necessary main clause or 2) connecting the fragment to a main clause already in the passage. Whether you add or connect, you must use the right punctuation.
Some fragments, for example, will require a **comma** if you connect them at the *beginning* of a main clause. If you choose to connect them at the *end*, however, these same fragments require no punctuation at all. Other fragments will require a comma whether you connect them at beginning or the end. To make an intelligent punctuation decision, you first must identify the *type* of fragment that you have.

A fragment will often be a *subordinate clause*, *participle phrase*, *infinitive phrase*, afterthought, lonely *verb*, or *appositive*. Each type of fragment has a *marker* that identifies it.

**Subordinate Clause Fragments**

A subordinate clause fragment (sometimes called a *dependent clause* fragment) will begin with a *subordinate conjunction* or a *relative pronoun*. You will also find a *subject* and a *verb*. Unfortunately, this combination of words will not express a complete thought *by itself*.

Think of the problem like this: At work, there are bosses and their employees, also known as *subordinates*. When the bosses are not directly supervising, many subordinates neglect their responsibilities.

In a sentence, the main clause is the boss. If the boss is absent, the *subordinate clause* goofs off, and the job of communicating a full thought does not get done.

Here are the words that will begin a subordinate clause fragment:

<table>
<thead>
<tr>
<th><strong>Subordinate Conjunctions</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>after</td>
</tr>
<tr>
<td>although</td>
</tr>
<tr>
<td>as</td>
</tr>
<tr>
<td>as long as</td>
</tr>
<tr>
<td>as soon as</td>
</tr>
<tr>
<td>as though</td>
</tr>
<tr>
<td>once</td>
</tr>
</tbody>
</table>
because | provided that | where
before | rather than | whereas
even if | since | wherever
even though | so that | whether
how | than | while
if | | why

<table>
<thead>
<tr>
<th>Relative Pronouns</th>
</tr>
</thead>
<tbody>
<tr>
<td>that</td>
</tr>
<tr>
<td>which</td>
</tr>
<tr>
<td>whichever</td>
</tr>
</tbody>
</table>

These words are your *markers* for subordinate clause fragments.

Here are examples:

*Because* Chase caught the eye of the beautiful brunette *in algebra*.

*Because* = subordinate conjunction; *Chase* = subject; *caught* = verb.

What happened? Was he able to cheat on the test? Did he quickly ask her *for a date*? *We do not know because the thought is* *incomplete*.

*Until* Rachel notices the toilet paper stuck to her *shoe*.

*Until* = subordinate conjunction; *Rachel* = subject; *notices* = verb.

What will happen? Will she embarrass her date? Will people at the restaurant *stare*? *We do not know because this is another* *incomplete* thought.
Even though Fred stuck straws up his nose.

*Even though* = subordinate conjunction; *Fred* = subject; *stuck* = verb.

What happened? Did he still not pass for a walrus? Did the restaurant manager offer him a job anyway? We do not know because this thought is *incomplete* too!

*Where* the popcorn is stale and the soda flat.

*Where* = subordinate conjunction; *popcorn* = subject; *is* = verb.

Obviously, we should avoid this place, but where is it? We do not have enough information to know because we have only *half* the thought.

*Whom* you can trust with the secret.

*Whom* = relative pronoun; *you* = subject; *can trust* = verb.

Who is this person? We do not know because this thought is *unfinished*.

**Participle Phrase Fragments**

A *participle phrase* fragment will often begin with a word ending in *ing* or *ed*. In the case of *irregular verbs*, an irregular past participle, like *broken* or *swum*, will begin the phrase. *Modifiers* and *objects* may follow, but nowhere will you find a *main clause* to complete the thought. By itself, a participle phrase cannot be a sentence.

Your marker for this type of fragment is the present or past participle that you will find at the beginning of the fragment.

Read these examples:

- *Sunning* themselves on the hot concrete until they heard human feet crashing down the sidewalk.

- All the while *twirling* the batons with the speed and ferocity of helicopter blades.

- *Sucked* down the pipe with a hearty slurp.
Hidden in the bureau drawer underneath a pile of mismatched socks.

**Infinitive Phrase Fragments**

An **infinitive phrase** fragment will begin with *to* followed by the base form of the verb, like this:

\[
\text{To } + \text{ Verb} = \text{Infinitive.}
\]

Although more words will follow to finish the phrase, you will not find a **main clause** to complete the thought. An infinitive phrase—by itself—cannot be a sentence.

Your marker for this kind of fragment is **To + Verb**.

Read these examples:

- *Only to watch* in dismay as Professor Frazier poured her chemistry experiment into the sink.

- *To catch* butterflies for her biology project.

- *To break* a piece of plywood with his bare hands.

**Afterthought Fragments**

An afterthought clarifies earlier information by providing specific details. When an afterthought does not contain a **main clause**, it is a fragment.

These words and phrases frequently begin afterthoughts: *especially, except, excluding, for example, for instance, including, like, and such as.*

These words are your markers for this type of fragment (although infrequently you will have *just* the list of details).

Here are examples:

- *For example*, leaky pens, candy wrappers, dollar bills, and paperclips.

- *Including* the dog with three legs and the cat with one eye.
Such as leaving the stove on and teasing mean dogs.

**Lonely Verb Fragments**

Writers will sometimes forget to include a **subject** in a sentence. The result is a **verb** pining for its partner. With the subject missing, the word group becomes a lonely verb fragment.

A lonely verb fragment will often begin with a **coordinating conjunction** (**and**, **but**, **for**, **or**, **nor**, **so**, **yet**). The marker for this type of fragment will be the unanswered question **Who?** or **What?** as you attempt to determine the subject.

Here are examples:

- And **dashed** through the downpour as raindrops softened the hairspray shell holding her elaborate coif in place.
- But **knew** that all his effort would prove useless in the long run.
- ** Took** the thick book and, with a heavy sigh, loaded it on top of her research pile.

**Appositive Fragments**

An **appositive** is a **noun phrase** that renames and clarifies another **noun**. Because an appositive can be long, writers sometimes mistake one for a complete sentence. By itself, however, an appositive is a fragment.

An appositive fragment will begin with a noun and usually include one or more clarifying **phrases** or even a **subordinate clause** after it.

Here are examples:

- The unprepared **student** who was always begging for an extra pencil and a couple sheets of blank paper.
- A **slacker** wasting his afternoon in front of the television.
- A **dog** around whom people need to guard their fingers and food.
Know how to fix the fragments that you find.

You can fix any fragment by either 1) revising the fragment so that it includes a main clause or 2) connecting the fragment to a main clause that comes before or after it.

To connect the fragment, you will need a basic understanding of punctuation. Learning the nine punctuation rules below will help you not only fix fragments but also punctuate many sentences correctly.

**Fixing Subordinate Clause Fragments**

When you have a subordinate clause fragment, removing one thing—the subordinating word—will give you the necessary main clause.

Read this example:

Because Chase caught the eye of the beautiful brunette in algebra.

Removing *because* makes the thought complete. *Chase* is the subject, *caught* the verb. And now you have a sentence!

Chase caught the eye of the beautiful brunette in algebra.

If, however, you need the subordinating word because of the meaning it provides, then fix the fragment by connecting it.

If you attach the fragment *after* a main clause, use **Punctuation Rule 1:**

```
Main Clause + Ø + Subordinate Clause
```

Here is an example:

We will continue giggling until Rachel notices the toilet paper stuck to her shoe.

If you attach the fragment *in front of* a main clause, use **Punctuation Rule 2:**

```
Subordinate Clause + , + Main Clause
```

Here is an example:
Even though Fred stuck straws up his nose, Melissa ate her tuna fish sandwich and continued to ignore him.

**Fixing Participle Phrase Fragments**

One way to fix a participle phrase fragment is to add the necessary main clause.

Consider this fragment:

Sunning themselves on the hot concrete until they heard human feet crashing down the sidewalk.

Notice that you are not sure what species is enjoying the warmth. If you add this information and complete the verb, the problem is fixed:

The little lizards were sunning themselves on the hot concrete until they heard human feet crashing down the sidewalk.

In addition, you can attach a participle phrase fragment after a main clause.

Just follow **PUNCTUATION RULE 3**:

Main Clause + , + Participle Phrase

Here is an example:

The majorette marched at the front of the parade, all the while twirling her batons with the speed and ferocity of helicopter blades.

Or you can choose to use **PUNCTUATION RULE 4**:

Participle Phrase + , + Main Clause

The participle phrase introduces the main clause, like this:

Sucked down the pipe with a hearty slurp, the dirty bath water drained from the tub.
**Fixing Infinitive Phrase Fragments**

You can convert an *infinitive phrase* fragment into a sentence by adding a *subject* and conjugating the *verb*.

Read this fragment:

> Only to watch in dismay as Professor Frazier poured her chemistry experiment into the sink.

When you read this fragment, you do not know *who* is involved. With a couple of minor changes, however, you have the necessary *main clause* that every sentence requires:

> **Amber watched** in dismay as Professor Frazier poured her chemistry experiment into the sink.

If you do not like that option, you can attach an infinitive phrase fragment after a main clause.

Just follow **Punctuation Rule 5**:

\[
\text{Main Clause} + \emptyset + \text{Infinitive Phrase}.\]

Here is an example:

> Jossie enlisted the help of several spiders *to catch butterflies for her biology project.*

Or you can use **Punctuation Rule 6**:

\[
\text{Infinitive Phrase} + , + \text{Main Clause}.\]

The infinitive phrase introduces the main clause, like this:

> To break a piece of plywood *with his bare hands*, Daniel followed his karate teacher's advice and focused his power.

**Fixing Afterthought Fragments**

You can fix an afterthought fragment one of two ways. One option is to insert the missing *subject* and *verb* so that you have a *main clause*. This option works
best when you have *for example* and *for instance* as the transitions beginning the fragment.

Read this fragment:

For example, leaky pens, candy wrappers, dollar bills, and paperclips.

The simple addition of a subject and verb fixes the problem:

For example, the desk drawer contained leaky pens, candy wrappers, dollar bills, and paperclips.

Or you can attach the afterthought fragment to the end of a main clause. This option works best when the fragment begins with *except, excluding, including, like* and *such as*.

Use **Punctuation Rule 7:**

```
Main Clause + , + Afterthought Transition + Ø + Details.
```

Here is an example:

John has many unsafe habits, such as leaving the stove on and teasing mean dogs.

**Fixing Lonely Verb Fragments**

One missing element—the *subject*—makes a lonely verb fragment an error.

Read this example:

And dashed through the downpour as raindrops softened the hairspray shell holding her elaborate coif in place.

Who did the dashing? We do not know. The subject may have been mentioned in a sentence that came previously, but *this* word group is a fragment because no subject exists in *it*.

To correct the error, all you need to do is insert a subject, like this:
Betty dashed through the downpour as raindrops softened the hairspray shell holding her elaborate coif in place.

If you want to connect this type of fragment to a main clause in front, use **Punctuation Rule 8:**

**Main Clause** + Ø + **Lonely Verb Phrase**, *

With a heavy sigh, Darryl began counting the words of his essay but knew that all his effort would prove useless in the long run.

*If the coordinating conjunction beginning the lonely verb phrase connects three or more verbs, you will need to use a comma. Review Comma Tip 4.

**Fixing Appositive Fragments**

You have two options when fixing an *appositive* fragment. Since an appositive contains a *noun*—which can conveniently become a *subject*—adding a *verb* will often fix the problem.

Read this example:

The unprepared student who was always begging for an extra pencil and a couple sheets of blank paper.

We know *who* is involved; now we need to know what this student *did*.

The unprepared student who was always begging for an extra pencil and a couple sheets of blank paper sneezed.

If you do not like sneezed, try cried, sang, protested the accusations, bit his lip, crossed his fingers, flirted with Jasmine, etc.

Another good option is to connect the appositive to a *main clause.*

**Punctuation Rule 9** says this: No matter where you attach the appositive—at the beginning, in the middle, or at the end—always use comma(s) to separate it from the rest of the sentence.

Here are examples:
A slacker wasting his afternoon in front of the television, Brian opened a bag of potato chips instead of his chemistry textbook.

Brian, a slacker wasting his afternoon in front of the television, opened a bag of potato chips instead of his chemistry textbook.

On the lawn chair lay Rocket, a dog around whom people need to guard their fingers and food.
